Dear Chris

This week has seen a tremendous team effort from everyone involved in the C-PAP Flow Generator Project. The daily build rate quickly increased to approximately 1,000 per day and then peaked at 1,230 on Easter Sunday. The 10,000th device was completed today with the box closed this afternoon.

Thank you so much for your incredible support, contribution and round the clock effort.

With best regards

Andy Cowell
Managing Director
